Trails Update to CLCC for November 19, 2026

Snow Trails

- We brushed the Devil's Creek Snow Trails on Saturday, October 3rd. Thank you to all who joined us. Now we just need some snow!

Walkable Community

- SAFETY PATH:
  During the October 13th DOT Project 45-60 Update that they held at the Hall we learned that they will bring the upgraded Safety Path, a separated, paved, walk/roll pathway westward through the rock wall pinch point just east of the old Kenai Lake Lodge site. That was hugely welcome as we knew that rock wall made passage unsafe as it squeezed us between the mountain and the road traffic. They will lay the rock wall back to a stable grade and widen the space for walkers, bikers, and others to move through. Altogether, our old Safety Path will be upgraded and extended from Perseverance Way by Three Bears west to the old Kenai Lake Lodge site as a part of the MP 45-60 Project.
- FLAP:
  DOT is planning a Cooper Landing Transportation Master Plan to provide long-term vision for the transportation system through Cooper Landing on what will become our town road after the MP 45-60 Project is complete. Our FLAP grant will likely contribute funding as our Cooper Landing Town Road Pathway Planning project will become a part of the transportation master plan. DOT anticipates starting this planning in January or February 2027. Their website isn't up and running yet but we'll keep you apprised of information on this as it becomes available to us.

Trails

- When you do trail brushing, please drop materials off the trail and close to the ground so that they will more readily compost over time.
- As requested, we will plan a walking route around the CLCC grounds that could also connect to the Bean Creek Footpath. If you have some ideas, please let us know.
